- **Adjustment of the passenger fee to encourage traffic growth and the improved use of infrastructure**

Methods and conditions for the calculation of the reduction are detailed below:

- Methods of allocation:

For eligible airlines, a reduction of the passenger fee granted for the IATA year, subject to conditions, shall be calculated at the end of the given IATA year and allocated in the form of a credit valid for the passenger fee for the following IATA year for this same airline.

- Conditions of allocation:

The airline benefiting from the reduction shall be the airline benefiting from the time slot enabling it to provide commercial flights.

To benefit from the reduction for the IATA year N, the airline must meet all the following conditions:

- Departing passenger for the airline across Paris – Charles-de-Gaulle and Paris - Orly airports of more than 10,000 passengers¹ in IATA year N.
- Total traffic growth for the airline at these two airports between IATA year N and IATA year N-1 must be over 6.4%.
- The traffic growth for the eligible airline must not be the consequence of an operation on capital between two airline companies with which it would work (end of operations for one airline on ADP platforms, where traffic would be transferred or taken over by another airline, ...). In this case, the calculations are applied across all parts of the two airlines for the year of operation.
- The reduction only applies for the IATA year during which the traffic growth is noted.
- The scope of companies eligible relates to those still operating from Paris-Orly and Paris-Charles de Gaulle airports, on the date 31 March 2015 ;
- The airline transporter should have referred, if appropriate and at the latest by the 31 March 2015, to all formal demand relative to the payment of the passenger fee for which the deadline has expired by this same date.

- Methods for calculating the reduction:

For airlines meeting the above conditions, the amount of the reduction on the passenger fees allocated to said airlines shall be calculated as follows:

- If the total amount of the reductions calculated for all eligible airlines is less than €5 million (€ at 2010 levels) (*amount indexed annually, under the ERA ; the applicable total threshold for reductions within IATA year 2014 being mentioned at the paragraph c)*), the airline shall benefit from a reduction on the passenger fees equal to:

$$\text{Reduction}_n = (\text{No. Departing passengers}_{>6,4\%}) \times (\text{Average passenger category fee}_{>6,4\%}) \times 30\%$$

Where:

- "No. Departing passengers_{>6,4%}" = number of departing passengers for the airline in IATA year N exceeding the growth threshold of 6.4% in relation to airline traffic in IATA year N-1 (it being understood that this number is positive);
- "Average passenger category fee_{>6,4%}" =
$$\frac{[\sum_i (\text{Passenger category no.}_{>6,4\%, i} \times \text{Category fee})]}{\sum_i (\text{Passenger category no.}_{>6,4\%, i})}$$

where:

"i" represents all uniform passenger fee pricing categories (*meaning the 6 categories corresponding to the various pairings:*

¹ Passengers billed for the passenger fee.

- domestic flights within France and the Schengen area; EU; EEA outside the Schengen area and overseas territories; international;

- excluding connecting passengers; including connecting passengers).

"Passenger category no. $>6,4\%$ i" represents the number of departing passengers for the airline in a uniform pricing category corresponding to growth of over 6.4% (it being understood that this number is positive).

b) If the total amount of the reductions calculated for all eligible airlines is over €5 million (€ at 2010 levels) (*threshold indexed annually, under the ERA ; the applicable total threshold for reductions within IATA year 2014 being mentioned at the paragraph c)*), each eligible airline shall benefit from a reduction calculated on a pro rata basis on this threshold.

c) Within IATA year 2014, the applicable total threshold for reductions shall be € **5,563,875.09**.

4. Fees for check-in counters and boarding gates and origin/destination baggage handling at the Paris - Charles-de-Gaulle and Paris - Orly airports
